

Technical Data Sheet

DINITROL PVC Activator

DINITROL® D-560

General description

D-560 PVC Activator is used specifically for activating encapsulated PVC (Polyvinyl chloride) glass typically found in some quarter-glass.

Shelf Life

9 months in an unopened bottle

Storage requirements

Recommended storage temperature is between 5°C (40°F) and 27°C (80°F).

Packaging

Red capped bottles
1.0 oz cans per box

Part

D-560S

Application/Dry Time

10 minutes

Post Application/ Working Time

Approximately 12 hours

Open Shelf Life

1 week after bottle has been opened and lid is kept on tight.

560 should not be used if the product has remained open for an extended amount of time. The lid must always be replaced promptly after each opening. Keep lid closed tightly with seal in place.

Health and Safety Caution

Wear OSHA and ANSI Z87.1-1989 approved safety goggles and nitrile gloves with any OEM/aftermarket primer.

Working conditions with good ventilation is required. If this is not possible consult the D-560 Safety Material Data Sheet for recommended options of use during poorly ventilated conditions.

Application

Sand or scuff the surface to be treated before application. Use a clean woolen dauber, synthetic cotton ball or lint free cloth to apply product. Wipe on a smooth continuous film of D-560 to the bonding area of the encapsulated PVC (Poly Vinyl Chloride) glass. Let dry for 10 minutes.

***Application below 0°F is not recommended**
